MISSION

NCX intend to meet the target as a token that provides capital resources for multiple projects that will be developed at the same time as a money machine for the NCX token itself to guarantee price increases.

How that's possible, did DEV need to sell of \$NCX to gain the fund for the project?

That's will not going to be happen here as the Genius structuring had been scripted in the hardcode itself which the smart contract will do it automatically without significantly harming momentum of chart growth.

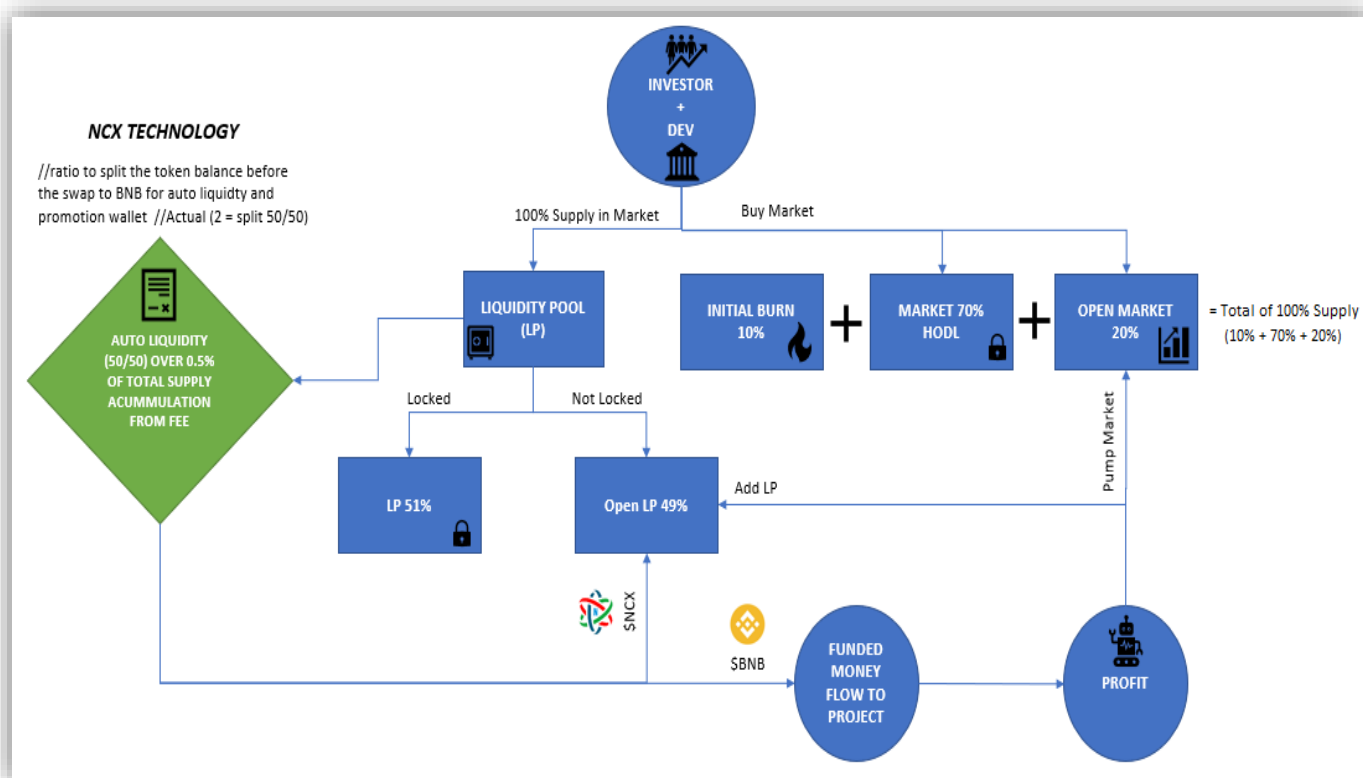

This is what we call the BEST of NCX Technology.

VISION

NCX Technology drives to be a funding token, with a diverse community working together to achieve a common goal: A ROBOT Technology that always be upgrading, evolving, and actively running wisely by minor supervision.

To achieve this, development and management of NCX will be decentralized, with governance decisions guided by the NCX Foundation, and NCX Foundation reinvested in the long-term success of the system cycle.

NCX LaunchPad

Stage 1

Members of our 'Approved Community' buy first. Nobody else! No bots! No Strangers! No Risk! Who is the initial Approved Community? This is where the INVESTORS and DEVELOPERS for this NCX Project.

This inner core of members are people we trust completely. However, we still need to protect non-members, so Stage 1 has a very strict holder limit. Nobody can buy more than 2% of a token supply, avoiding the risk of a whale wallet from within the community.

As well as being handpicked for the 'Approved Community' all members must hold NCX accordingly.

Stage 2

The next people that get to buy are the main NCX community members. These are the people in our elite community, when it is time for them to buy, we will announce to the group and anybody that wants to buy needs to send us their wallet address, so I can add it to the approved list.

How do you get to become a member of this elite community? Members are handpicked and added personally by us, or a member of our very trusted team. We watch our community at NCX very carefully, if we see that you are helping out, answering questions, offering support and guidance to other members of the community we invite you in.

Only wallets that we personally approve can buy. Again, no bots can touch us. And these people must hold NCX accordingly.

Stage 3

We open up to the public. Anybody can buy... and we watch the transactions very carefully. If necessary, we pause the contract to blacklist bots!

We take these measures to ensure a safe launch. We want to protect our community from the bots, and from each other! So, no whale wallets, and no bots! By restricting our launches to good people that we trust we give our tokens the very best start.

Our launches are discreet for a reason. We are not trying to create hype to get a 1000x token seconds after launch. This activity attracts a lot of attention from bot users! We deploy discreetly to a community we trust, and slowly open up to a larger community at each stage.

By the time bots can buy, they don't want to buy! They are only interested in getting in first. And that simply is not possible due to the way we deploy our contracts.

Then we promote.

A final word on bots....

If you use bots, then expect your wallet to be blacklisted. We use several ways of discreetly detecting bots (none of which are revealed in this contract) if we detect that you are using a bot (on ANY contract, not just NCX) I will blacklist your wallet.

This brings us on to our....

TERMS OF SALE

If you use bots, you are not permitted to purchase NCX or any future token that launches via the NCX LaunchPad. Any purchase that you make will be considered a 100% donation to the NCX community. Your account will be locked and you will not be able to sell or swap your tokens.

We do not permit bots at all. Of ANY kind. If you use them, do not attempt to buy NCX. You will lose your money.

So hopefully we only have the good, wholesome, and honest people left.

Our Tokenomic....

Redistribution to Holders (Reflection)

We have a redistribution fee of 1% on all transactions.

To get more NCX, just buy and hold. Every transaction puts more NCX in your wallet completely automatically

Auto-Liquidity

We have a 3% fee on all transactions that is added to the liquidity pool for NCX

We use them in 2 very clever ways....

1. We use them for Giveaways/Marketing
Road Tour, SOCMED Ads, this helps to promote NCX
2. If the price of NCX drops, due to people selling or general market conditions, we manually burn some tokens from this wallet to recover the \$ value on NCX
Terms and Condition applied.

When this wallet is holding more tokens than we need, we lower the fee to 0% and we move the 2% to other places where it can be used most effectively. Either to the Auto-Liquidity, the marketing wallet or to boost the redistribution to holders.

Marketing

Finally, we have the marketing wallet. This takes a 3% fee on all transactions, it is paid directly to the wallet in BNB and is used to cover all of our expenses and pay for marketing of NCX

The total supply of NCX at launch is 10,000,000,000 *10**18
We will burn 10% of the initial supply. This means that the burn wallet is counted as a holder of NCX, and is included in the redistribution reward. So, every transaction some tokens are automatically burned. Burning tokens lowers the total supply, which increase the value of all remaining tokens... which you hold!

Transaction Limits (Anti Whale & Anti Dump)

We have max transaction limits and max token holding limits.

At launch, the max transaction limit is 2% of the total supply, and the max holding limit is 2% of the total supply. These will be micro-managed as needed as NCX holders grow.

All of our decisions have been made to make NCX Token as safe, and profitable as possible for you.
